DETAILED ACTION

In response to the Applicant's arguments filed on June 16, 2005, the Election/Restrictions requirement cited in the Office Action mailed on May 20, 2005 has been withdrawn. However, a new Election/Restrictions requirement is required as follows:

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: claims 27-28 and 31-50 direct to a cell phone holding and charging device comprising a support provided at the upper surface of the vehicle dashboard, the support having a connecting joint supporting the holder above the upper surface of the dashboard for adjustable movement of the holder about at least a vertical axis and an axis lateral to the vehicle (See figs. 7-8).

Species II: claim 29 directs to a cell phone holding and charging device comprising a support that includes a cigarette lighter socket mounted in the upper surface of the dashboard and a cigarette lighter plug for fitting into the cigarette lighter socket, and a connecting point is provided on the cigarette lighter plug (See figs. 1-2).

Art Unit: 2682

Species III: claim 30 directs to a cell phone holding and charging device comprising a support that includes a compartment below the upper surface of the dashboard and a cover on the compartment, the cover being operable to an open and generally vertical position extending above the upper surface of the dashboard, the a connecting point is provided on an inner side of the cover whereby the holder is received in the compartment in the closed position of the cover (See figs. 3-4).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 27 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2682

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. John D. McConaghy (Reg. 26,773) on 08/22/2005 a provisional election was made **without traverse** to prosecute the invention of Species I, claims 27-28 and 31-50. Affirmation of this election must be made by applicant in replying to this Office action. Claims 29-30 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Allowable Subject Matter

Claims 27-50 are allowed.

The following is an examiner's statement of reasons for allowance:

The Applicant's response (See Remark, page 8 second paragraph and page 10 second paragraph), filed on 12/20/2004, clearly states the inventive steps of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
